SCHOOL SUPERINTENDENT'S REPORT.

To the Piermont School Board:

The work in our schools has progressed very smoothly during this year, and much real study and drill has been accomplished. To an unusual degree our teachers have been enthusiastic in their work, and have spent much time outside school hours in the preparation of lessons. As a result pupils have been busy, with almost no wasted minutes, and have progressed satisfactorily in their studies.

The matter of ventilation has received more attention and in general the schools have improved, for the fresher the air the greater the thinking capacity of the pupils. Some teachers succeed much better than others in ventilating their rooms, but it surely has been proven this year that the children in schools where the windows are kept open and the room rather cool, do not take cold as easily as those in close, hot rooms.

A few new sets of readers have been purchased, so that now there is a fairly good supply on hand, and there is an improvement in reading over last year's work. We need more than any other books, reference books for pupils and teachers, such as the following:

Arnold's	Reading, How to Teach It.
McMurray's	Lessons in Home Geography and Special Method in History.
Fiske's	The Beginnings of New England. Old Virginia and her Neighbors. Dutch and Quaker Colonies. The Critical Period in American History.
MacConn's	An Historical Geography of the U. S.
Hodge's	Nature Study and Life.

Our town library should be classified, catalogued, and kept in order, so that pupils and teachers could know what books are there relating to school subjects and be able to find them. This would not be a great expense to the town, and would more than double its value to citizens.

The most encouraging fact to the Superintendent is the increasing interest of parents in the schools. Many more parents have visited the schools during the past year, and their word of praise or friendly criticism has been very welcome, and will continue to be so. The teachers, under the

direction of the school board and superintendent are trying to educate our children in the best manner possible, and any suggestions are always gladly received.

A beginning has been made in replacing some of the poor blackboards with slate boards, and I hope it will continue to be the policy of the board in the future.

The winter term of school is still in session at the time this report is written, but except in East Piermont the schools will have been in session 34 weeks. The records of attendance, etc., cannot be complete, but is given for two terms. The superintendent has made during these two terms 53 visits, but the visiting is not completed for the winter term. There have been employed 16 different teachers in the nine schools, but I heartily agree with the board that the best work is done where the teacher remains at least a year, and for the year beginning in September we expect few changes. The teachers are the same for the winter term as for the fall term except that Miss Tewksbury is taking Miss Rodimon's place.

In closing I wish to thank the board for the pleasant way in which we have worked together, and I am glad to state my appreciation of the teachers, and of the efforts made by the pupils for good attendance and earnest work.

Respectfully submitted,

LOUISE S. HORTON.

Piermont, N. H., February 15, 1913.
